

RISE PROGRAMMING FREQUENTLY ASKED QUESTIONS

Penn State College of Nursing - Diabetes Care
for Older Adults Certificate

What Diabetes Management Skills will participants learn?

- **Enhance Diabetes Management Skills:** Train nursing home staff on diabetes pathophysiology, complications, and interventions, including blood glucose monitoring, medication administration, and tailored dietary recommendations for older adults.
- **Improve Patient-Centered Care and Communication:** Promote empathy and effective communication, teaching clinicians to understand residents' preferences and involve them and their families in care decisions to align plans with their values.
- **Promote Interdisciplinary Collaboration and Problem-Solving:** Foster teamwork among healthcare professionals, training staff to collaborate with providers and specialists to create comprehensive care plans for older adults with diabetes.

Who should take this Certification?

This certificate program for nursing home clinicians caring for older adults with diabetes has multiple goals to enhance patient care and staff competency/knowledge.

Where and when do I take this course?

The sessions will be virtual and the participants will have to complete all three sessions to receive the certificate. If they miss the live session- we will be recording it for those to rewatch at later times:

- 1pm on March 4th, 2025
- 1pm on March 11th, 2025
- 1pm on March 18th, 2025
